Keck Graduate Institute

ABSTRACT

The Internet and the World Wide Web have led to a massive increase in the amount of data publicly available for researchers to analyze. This has resulted in the growth of new fields of study like Data Mining and Machine Learning. A hot topic these days is the field of Text Mining. In this talk I'll give an introduction to some ideas and techniques in Text Mining that span a variety of disciplines including the humanities (Literature and History) and the sciences (Functional Genomics and Bioinformatics).

Wednesday, October 21, 2009, at 4:15pm

Millikan 134, Pomona College

Refreshments served at 3:45 p.m.

Harry Mullikin Room, Millikan 209

*The dinner will be hosted by Prof. Mario Martelli
If interested in attending, call ext. 78036*
